

HIDEEZ BAND

Wristband that Makes Your Life Safer

www.Hideez.com

HIDEEZ BAND

- ★ **Identity token** and a **safe vault** storing up to 1000 passwords for websites and software on your computer or phone with automatic input.
- ★ Quick locator, proximity sensor and theft alarm for **valuable objects or beings** (car keys, purse or a pet).
- ★ Bright and **efficient LED-matrix screen** for time, notifications and random 2-factor PINs.
- ★ Biometric identification with **owner's iris** (eye pattern) to activate HideezBand™.
- ★ **IP67** dust tight and water-resistant case.
- ★ 80 mAh battery for **14 days of active use** before being charged by a magnetic charger.

Customer Segments

- ★ **Private customers** who have sensitive information on their devices, would like to protect this information by controlling the access to their devices as well as applications and websites, and want to do it in a **handy way**.
- ★ **Corporations** willing to implement their data protection procedures in a non-intrusive and **employee-friendly** manner.

Personal Security

- ★ **Control access** to all your devices based on your physical presence nearby. None will even notice.
- ★ Use HideezBand™ as a **hardware token** to encrypt personal files like photos, documents or Bitcoin wallet credentials.
- ★ Store all your passwords in **encrypted password manager**. You can opt in to **sync your data** in hashes to our servers via SSL connection to recover it in case you lose or damage your HideezBand™.
- ★ Use HideezBand™ as a **security monitor** and **prompt alarm** for object, to which HideezKey™ is attached.

Corporate Security

- ★ Supports **multi-layer identification**.
- ★ Can store employee's **digital signature**.
- ★ Provides **physical access** control for employee's device in a non-intrusive and friendly manner.
- ★ Can be flexibly integrated into the **access control system** of a corporation.
- ★ HideezBand™ can be **remotely deactivated** if a corporation deploys Hideez Server™.

Banking and Cryptocurrencies

- ★ **Reliable identification** of the client.
- ★ **Safe vault** for digital signatures, security certificates and blockchain credentials.
- ★ Simple and efficient **endpoint security** solution.
- ★ **External** hardware encryption layer.

Functionality Overview

- ★ Locking/unlocking of the device based on user proximity according to the **strength of Bluetooth® signal** (RSSI).
- ★ **Theft alarm** based on RSSI proximity sensor.
- ★ Safe **encrypted vault** with automated input for passwords to software and websites. This will save user up to 200 minutes a month spent on inputting passwords.
- ★ One-time-password (**OTP generator**) with **secure instant LED output** for two-factor authentication in services like Google® Account, Windows Live®, Slack®, Facebook®, GitHub®, Evernote®, etc.
- ★ **Synergy functionality** if you own both: HideezBand™ and HideezKey. *See next slide and HideezKey™ presentation.*

Synergy with HideezKey™

- ★ Use Your HideezKey™ for **safe backup** of Your HideezBand™. This method does not require Internet connectivity or synchronization via Hideez™ Server.
- ★ Receive **security notifications** from Your HideezKey™ directly to Your HideezBand™ when the objects and beings under surveillance leave the secure area.

Please see HideezKey™ presentation for additional details on HideezKey™
Please request our **white paper** by sending your inquiry to on@hideez.com
to get additional information on Hideez™ technology.

Apple® Watch, Samsung® Gear, etc.

- ★ Already got a smartwatch?
HideezBand™ can complement your existing gadget via its smart lace that can be attached to Apple® Watch or variety of Android®-based smartwatches.
- ★ You get **additional security** and **energy efficient second screen** with active time of 14 days before the next charge.

Customization

- ★ We can use **any Pantone® color** as HideezBand™ lace color.
- ★ Laces can be made of a **variety of materials**, including leather, metal and silicon.
- ★ We can imprint your branding on the HideezBand™ case and lace.
- ★ We can customize Hideez™ interface with your corporate **colors, brand name** and **logo**.

Product Specification

- ★ LED **5x48** matrix display
 - ★ Accelerometer and gyroscope
 - ★ Bluetooth **4.2 LE** connectivity
 - ★ Haptic feedback engine
 - ★ **80 mAh** battery for **14 days** of active use
 - ★ **IP67** stainless steel case
 - ★ Magnetic charger
- ★ Works with Android **4.4+** and Windows **8.1+** devices
 - ★ iOS and OS X versions currently in testing

Iris Pattern Identification

- ★ **Device activation** is required when setting up HideezBand™ or when the lace is unlocked.
- ★ The **initial activation** is performed by iris (eye pattern) scanning. The device then stays active **until the lace is locked** on customer's hand.
