

# HIDEEZ KEY

**Your Single Digital Key**

# HIDEEZ KEY

- ★ Wireless **digital access key** and identity token that stores up to 1000 passwords for websites and software installed on your computer.
- ★ Quick locator, proximity sensor and theft alarm for **valuable objects** or beings (like car keys, purse, laptop case or even a pet!)
- ★ A **remote** for your phone enabling features like discreet voice recording or distant video camera activation.

## Customer Segments

- ★ **Private customers** who have sensitive information on their devices, would like to protect this information by controlling the access to their devices as well as applications and websites, and want to do it in a **handy way**.
- ★ **Corporations** willing to implement their data protection procedures in a non-intrusive and **employee-friendly** manner.

# Functionality Overview

- ★ Locking/unlocking of the device based on user proximity according to the **strength of Bluetooth® signal** (RSSI).
- ★ Safe **encrypted vault** with automated input for up to 1000 passwords to software and websites. This will save user up to 200 minutes a month spent on inputting passwords.
- ★ One-time-password (**OTP**) **generator** for two-factor authentication in services like Google® Account, Windows Live®, Slack®, Facebook®, GitHub®, Evernote®, etc.
- ★ **Theft alarm** based on RSSI proximity sensor.
- ★ Access control and monitoring tool, capable of **activating device camera** if device position changes while a user (and his HideezKey™) is away.

## Wunderbar Features

- ★ Requires **no cable** or USB port. Wireless, encrypted and energy efficient Bluetooth LE connectivity.
- ★ Needs **no plugins**. You install single app that works with literally any software or websites.
- ★ Uses automated script, saving you those **7 minutes a day** and eliminating the hassle of remembering the long passwords (while enabling you to use passwords of any complexity).
- ★ **No charging** is needed. Device uses CR2032 type battery that costs <\$1 and lasts for 6 months.

## Personal Security

- ★ **Control access** to all your devices based on your physical presence nearby. None will even notice.
- ★ Use HideezKey™ as a **hardware token** to encrypt personal files like photos, documents or Bitcoin wallet credentials.
- ★ Store all your passwords in **encrypted password manager**. You can opt in to **sync your data** in hashes to our servers via SSL connection to recover it in case you lose or damage your HideezKey™.
- ★ Use HideezKey™ as a **security tag** for objects to which it is attached.

# Corporate Security

- ★ Supports **multi-layer identification**.
- ★ Can store employee's **digital signature**.
- ★ Provides **physical access** control for employee's device in a non-intrusive and friendly manner.
- ★ Can be flexibly integrated into the **access control system** of a corporation.
- ★ HideezKey™ can be **remotely deactivated** if a corporation deploys Hideez Server™.

# Banking and Cryptocurrencies

- ★ **Reliable identification** of the client.
- ★ **Safe vault** for digital signatures, security certificates and blockchain credentials.
- ★ Simple and efficient **endpoint security** solution.
- ★ **External** hardware encryption layer.

## Proximity Alarm

Attach HideezKey™ to your purse, backpack, keychain or pet's collar to:

- ★ Get instant visual and sound **notifications** when you are about to lose your pet or personal item.
- ★ Locate lost items and pets by activating **sound alarm** on their HideezKey™.

# Technologies Under the Hood

- ★ RSA-1024
- ★ AES-CCM (FIPS-1971) Bluetooth® 4.2 bonding with IRK
- ★ RFC 6238 for OTP
- ★ Open SSL compatible
- ★ Virtual keyboard driver is required to enable automated password input for Windows 8.1 and higher.

Please request our **white paper** by sending your inquiry to [on@hideez.com](mailto:on@hideez.com) to get additional information on Hideez™ technology.

## Product Specification

HideezKey™ currently works with:

- ★ Windows 8.1 and higher;
- ★ Android 4.4 and higher;
- ★ MacOS and iOS are currently in testing.

- ★ Bluetooth 4.0 Low Energy
- ★ CR2032 Battery Life is 6 months.
- ★ Dimensions: 31 x 31 x 7,5 mm
- ★ Weight: 8 g

## Customization

- ★ We can use **any Pantone color** as HideezKey™ case color.
- ★ We can imprint your branding on the HideezKey™ case.
- ★ We can customize Hideez™ interface with your corporate **colors, brand name and logo.**
